HSI Workshop Tutorial Instructions

- Wednesday, December 10th
- 9:00 am to 11:45 am

- Goto GitHub link: https://github.com/SagarLekhak/InGARSS_2025_HSI_Tutorial_Workshop
- Download the dataset as a zip file (i.e., under Code button, select Download ZIP)
- Unzip the file locally on your machine, then upload the extracted folder to your Google Drive (assuming you have a Google Drive).
- From this list of files in your Google Drive, open the following two files.
  - Assuming you have Colab installed, if not installed then: Right-click click file → Open with → Connect More Apps, → search for Collaboratory → Install Collaboratory → Right-click click file → Open with → Google Collaboratory
    - Codes - Target Detection.ipynb
    - Codes - K Means Clustering.ipynb
- Run these files by replacing the file paths to the data with "your corresponding file paths" in your drive's uploaded folder.
- For me, it was
  - /content/drive/MyDrive/Tutorial Data from GitHUB/cup95eff.hdr'
  - /content/drive/MyDrive/Tutorial Data from GitHUB/cup95eff.int'

- **NOTE: Bring your own laptops**.
